Model RHB1 Spare Sprinkler Storage Cabinet

Product Description

Reliable spare sprinkler storage cabinets are designed to allow for storage of spare sprinklers as required by NFPA guidelines. The cabinets are available in six sizes:

All styles of spare sprinkler storage cabinets are manufactured with knockouts to facilitate storage of the most common size sprinklers. Shelves within each storage cabinet are positioned to enable storage of a sprinkler wrench. Each sprinkler storage cabinet is manufactured from 22-gauge steel and finished with red enamel paint. Each sprinkler storage cabinet features holes on the back panel to facilitate easy installation to existing structure of the building. Reliable spare sprinkler storage cabinets are not intended for harsh environments and are not recommended for outdoor exposure.

Installation

Installation is performed by using appropriate fasteners to securely mount the sprinkler storage cabinet to the wall using the holes in the back surface of the cabinet, ensuring that the door can freely open and close and that there are no obstructions that reasonably prevent access to the sprinkler storage cabinet or its contents. After installation of the sprinkler storage cabinet, the appropriate number and type of sprinklers shall be inserted into the cabinet in accordance with applicable requirements. Close the door to the sprinkler storage cabinet.
